When to use NFO?

- Urgent spare parts for production or repairs?
- AOG (Aircraft on Ground) shipments.
- Critical electronics, components, or prototypes.
- Medical equipment or diagnostic materials with strict timeframes.

Where does NFO operate?

- Globally – wherever commercial flight routes exist.
- From and to all major airports, with first-/last-mile pickup/delivery.

Who is NFO for?

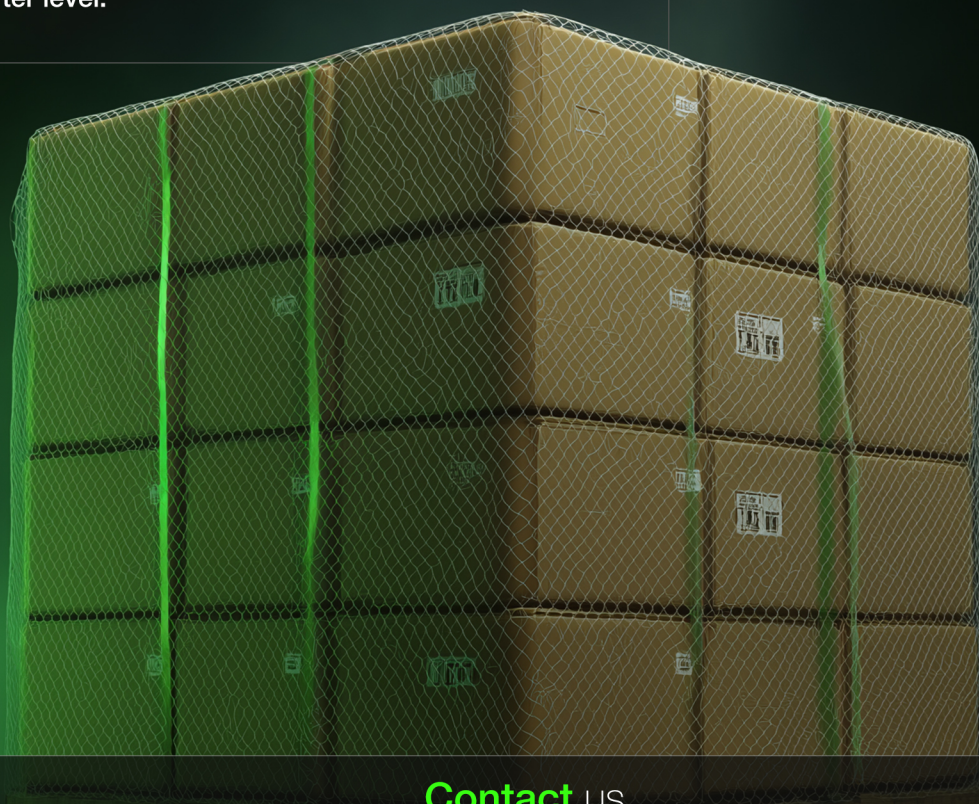

- Companies with urgent, time-sensitive shipments.
- Industries like aerospace, automotive, electronics, medical, or high-tech.
- Logistics teams who need fast, controlled transport without going to charter level.

How does NFO outperform standard air freight?

- Faster processing at the airport (no consolidation).
- Priority handling throughout the journey, 24/7 available through our time critical operations team.
- Greater control over departure and arrival windows.

Why choose NFO over charter or OBC?

- Faster than standard freight, less costly than charter.
- No physical courier needed, making it more scalable.
- Ideal balance of speed, cost, and reliability for many critical shipments.
